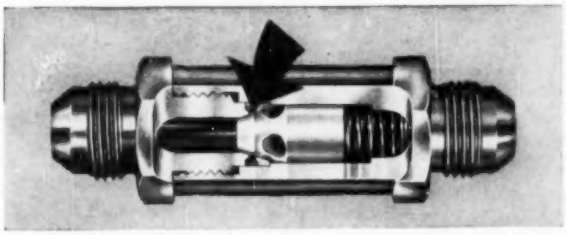
Circle 56 on Reader Service Card

Simple, Secure . . . Leak-Tight!

The FLEXIBLE SEAL SEAT*



Responsive action of the soft O-ring seal provides absolute leak-tightness. Instantly compresses to seal internal and external pressures. Draws harmlessly around dirt particles. No costly precision parts; no extra end seals. Stocked in 6 standard Dryseal pipe and JIC tube sizes; 12 connection combinations. Write for data sheet.

Announcing—

A NEW GRESEN VALVE With FLOAT Position

GRESEN HYDRAULICS

A Two Spool Directional Control With Float

FEATURES: Detent in Float Position—Self Centering From Power Positions—Fully Balanced—Relief Valve Has Replaceable Hardened Seat—Tripod Mounting Feet—Smooth Positive Throttling Action—Hardened and Chrome Plated Spools.

SPECIFICATIONS: Capacity 20 GPM (at 20 Ft/seconds)—Maximum Pressure 1500 PSI—Parallel Application—Shipping Weight 22-1/2 Lbs.

Write for literature

GRESEN MANUFACTURING CO.
628 Colfax Ave. N. Dept. H-126 Minneapolis 11, Minn.

3000 psi won't get by the threads of Allen ⬡ Dryseals!

ALLEN 'TRU-ROUND' Dryseal Pipe Plugs

formed from special analysis ALLENOY steels.

Sold only through leading industrial distributors—specify genuine Allen Dryseal Pipe Plugs.

standard sizes from 1/16" to 1-1/4"

Here's the dependable, metal-to-metal seal you need for hydraulic systems . . . for transmission, control, and automated mechanisms where pressures run high. The N.P.T.F. threads of Allen ⬡ Dryseal Pipe Plugs are smooth, burnished, and burr-free—do their job without any help from sealing compounds. Allen's unique "pressur-forming" process assures the highest degree of precision threading and dimensional accuracy. What's more, Allen ⬡ Dryseals are precisely round at root, pitch and crest, with taper held to extremely close tolerances.

Allen engineers will gladly help you to harness your hydraulic pressures. Just write.

CENTURY
RESERVOIR ACCESSORIES

BREATHER CAP (Model 8585)

- Contains replaceable dust & moisture proof air filter element
- Available with or without flange assembly
- Easy to install

Century carries a complete line of:

- STANDARD POWER UNITS—(SPECIALS TO ORDER)
- STANDARD RESERVOIRS
- RESERVOIR ACCESSORIES—
  - Oil-Level Sight Gage
  - Oil Clarifier Unit
  - Filler Breather Assembly
  - Breather Cap

Engineers—Send for new catalog containing complete dimensional information on reservoirs, accessories, etc.

6000 PSI

wide range, high-flow regulator

maintains high degree of accuracy with regulated pressures from 0 to 5000 psi!

performance features:

- Normal inlet pressure of 6000 psi!
- Wide adjustment range of 0 to 5000 psi with extreme sensitivity!
- Burst — 15,000 psi!
- Maximum required handle torque 30 inch lbs. due to planetary gear system in handle!
- Adaptable for use with air, nitrogen, helium and gaseous oxygen!
- ¼" tube straight thread gasket seal bosses per AND10050!
- Also available in AND10053 ¼" pipe thread!
- Internal valve and filter are removable without disturbing spring, diaphragm structure!
- Internal relief valve adjustable over entire outlet pressure range!
- Internal 5 micron filter!
- Bubble-tight shut-off!
- Adjustable mounting!

Please send me engineering data information on:

Part 110700—Air, nitrogen, helium. _____

Part 111700—Gaseous oxygen only. _____
